

Welcome to the Orofacial Pain Clinic

Before your appointment, we would like you to answer some questions about your health and wellbeing. This will help us to plan the best care for you.

IMPARTS: Integrating mental and physical healthcare: research, training and services

Services across Guy's and St Thomas' and King's College Hospitals use questionnaires to find out how you are feeling. The information you give helps us to give you the best possible care – for your mental and physical health.

This questionnaire is part of the IMPARTS programme. It is funded by King's Health Partners to bring together mind and body care.

e-IMPARTS: Accessing the questionnaire remotely and securely on your personal device

With e-IMPARTS, you can complete the questionnaire online on your own personal device (for example, your smartphone, laptop or tablet) up to 24 hours before your appointment. A link to the questionnaire may have been sent to you by the clinical team in advance of your appointment. If you did not receive this link, please scan the QR code on the left.

Your answers will be sent to the healthcare professional you have an appointment with. The information from the questionnaire is confidential and used to help your clinician give you with the best possible care. We will ask you to complete the questionnaire again when you have another appointment with us, so we can check how things are changing for you..

You can also complete the questionnaire using a tablet, if you would prefer, or don't have a smart phone. Please ask at reception.
